## Using Filezilla (FTP program) to access SPIRIT Images

Filezilla is a popular FTP program that allows you to access the images on SPIRIT. Any FTP program can access our server, however Filezilla is a free program that runs on Windows and Mac.

Once you have finished your live viewing or you have received an email saying your plan has run then your images are ready to access.

Download Filezilla from: <u>https://filezilla-project.org</u>

1. When you open Filezilla login using your SPIRIT login.

- 3. Once you have entered all the information click 'Quickconnect' and Filezilla will begin to connect to the server. This may take a while.
- 4. Once it is connected, on the left hand side you will see your own computer file system under local site and the SPIRIT server on the right hand side under remote site.

Click on SPIRIT Images. It may take a while to open this file. There will be a file with numbers that correlate to the date the

2

images were taken. Double click to open the file and you will see a list of the objects that you viewed.
